

# DISABILITY AND REHABILITATION RESEARCH COALITION

1501 M STREET, N.W. SUITE 700 WASHINGTON, D.C. 20005

December 5, 2016

Re: Support for Section 2040 in the 21<sup>st</sup> Century Cures Act

Dear Colleague,

On behalf of the Disability and Rehabilitation Research Coalition (DRRC), we write to strongly endorse Section 2040, “Improving Medical Rehabilitation Research at the National Institutes of Health (NIH),” in the “21<sup>st</sup> Century Cures Act” passed by the House on November 30, 2016.

Section 2040 is virtually identical to S.800, the “Enhancing the Stature and Visibility of Medical Rehabilitation Research at the NIH Act,” that was approved unanimously by the Senate Health, Education, Labor, and Pensions (HELP) Committee in February 2016. As you may know, this bipartisan legislation would advance rehabilitation science at the National Institutes of Health (NIH) and improve the care provided to people with disabling injuries, illnesses, and conditions.

Publication of the NIH’s report, “Blue Ribbon Panel on Medical Rehabilitation Research,” was the impetus for the original legislation. The panel concluded that rehabilitation research is not thriving at NIH in part because the NIH had not updated its research plan for the conduct and support of medical rehabilitation research since 1993.

Section 2040 enhances coordination within NIH and with other agencies to update and streamline rehabilitation research priorities. It specifies that the research plan must be updated every five years; provides for an annual progress report; promotes the development of guidelines by NIH governing the co-funding of medical rehabilitation; and includes a definition of medical rehabilitation research. Section 2040 contains extensive input from NIH and the disability and rehabilitation community and is expected to be budget neutral.

The DRRC is a coalition of 40 national non-profit organizations, including American Academy of Physical Medicine and Rehabilitation, American Congress of Rehabilitation Medicine, American Occupational Therapy Association, American Physical Therapy Association, Amputee Coalition of America, Association of Academic Physiatrists, Brain Injury Association of America, Christopher and Dana Reeve Foundation, Paralyzed Veterans of America, and RESNA, among others. As a coalition of national non-profit organizations committed to improving the science of disability, independent living, and rehabilitation, the DRRC seeks to maximize the return on the federal investment in disability, independent living, and rehabilitation research with the goal of improving the ability of Americans with disabilities to live and function as independently as possible.

Millions of Americans with disabilities, illnesses, and chronic conditions require medical rehabilitation to restore, maintain, or prevent deterioration of function. We strongly support Section 2040, important legislation which will help advance medical rehabilitation research at

the NIH. We hope you will consider our position as you weigh your support for the 21<sup>st</sup> Century Cures Act. If you have any questions, please contact Peggy Tighe ([Peggy.Tighe@PowersLaw.com](mailto:Peggy.Tighe@PowersLaw.com)) or Leif Brierley ([Leif.Brierley@PowersLaw.com](mailto:Leif.Brierley@PowersLaw.com)), our representatives in Washington, D.C.

Sincerely,

The Disability and Rehabilitation Research Coalition (DRRC)
